SARAVANAN R

Automation Analyst

SUMMARY

Automation engineer with 9+ years of experience turning manual business processes into automated systems. Built and ran the complete technology stack for a computer hardware distributor, covering ERP integration, automation workflows, a sales dashboard, a customer mobile app, WhatsApp automation and AI chatbots. Skilled in n8n, Microsoft Dynamics 365 Business Central, Supabase, React and Microsoft 365 administration, and comfortable working end to end from database and API layer through to frontend and mobile delivery.

WORK EXPERIENCE

Technical Implementer & Systems Administrator, Supreme Computers

Present

- Designed and maintained the production automation workflows on a self-hosted n8n instance running Docker
- Administered Microsoft Dynamics 365 Business Central end to end, managing user creation, permission sets, role assignments and access control, and integrated the system via REST API for live invoice, customer, item and vendor data.
- Built WhatsApp chatbot flows in Gallabox and trained an AI customer assistant on Chatbase across multiple LLM models, refining prompts to improve accuracy, while supporting the product team and employees on all internal systems.
- Built a WhatsApp-based OTP login and verification system for employees, using the Meta WhatsApp Business API and Supabase, with database-level access controls.
- Designed WhatsApp chatbot conversation flows in N8N with automated routing and human handoff, and trained an AI assistant on Chatbase across multiple LLM models to improve response accuracy.
- Built and published a customer-facing mobile app and progressive web app (PWA) on the Google Play Store, with a Supabase backend, n8n-powered live data integration and Firebase push notifications.
- Managed Microsoft 365 and SharePoint administration end to end, covering user provisioning, licence allocation, security permissions, Teams channels, billing and the public partner price book portal.
- Built an automated WhatsApp system using the Meta Business API that sends invoices and credit memos with PDF attachments to customers, triggered by ERP webhooks,

Data Analyst, Stats Perform

2020 – 2025

- Managed international inbound and outbound voice, chat and email support, including escalation handling.
- Troubleshoot VMware issues including snapshots and virtual machine network configuration.
- Worked with application proxy, MFA, SSO and IAM; prepared and maintained MIS reports and project plans.
- Trained and mentored team members while managing day-to-day process support.

Email Executive, Xalvadors Leads

2018 – 2019

- Handled email marketing, customer care and email support operations.
- Worked with email service providers including AWS, SendGrid and SparkPost, including API key integration.
