

SARAVANAN R

Automation & Business Systems Engineer

8668026319 | saravanan17021997@gmail.com | Chennai, Tamil Nadu

PROFESSIONAL SUMMARY

Technical implementer with over 6 years of experience across business automation, ERP integration and IT infrastructure support. Built and maintained a complete production automation stack connecting Microsoft Dynamics 365 Business Central to live dashboards, a customer mobile app and automated WhatsApp communication. Skilled in n8n, REST API integration, React, Supabase and Microsoft 365 administration.

WORK EXPERIENCE

Technical Implementer & Systems Administrator | Supreme Computers, Chennai

[Month Year] – Present

- Designed and maintained 39 production automation workflows on a self-hosted n8n instance running Docker and Traefik on a Linux VPS.
- Integrated Microsoft Dynamics 365 Business Central via REST API to deliver live invoice, customer, item and vendor data, handling OAuth token lifecycle, pagination and rate limits.
- Automated WhatsApp delivery of sales invoices and credit memos with PDF attachments, operating six days a week with zero duplicate sends through a database-backed deduplication layer.
- Built a role-based sales dashboard in React 18 and Vite serving three access tiers, with a caching layer that significantly reduced live ERP load via a scheduled refresh cycle.
- Delivered a customer-facing progressive web app through GoodBarber, engineering custom SVG charting and external script delivery to work within platform restrictions.
- Implemented WhatsApp OTP authentication using Supabase Edge Functions with row-level security policies.
- Administered Microsoft 365, SharePoint and Teams, plus Google Play Console, Firebase and Meta Business accounts.

Data Analyst | Stats Perform

2020 – 2025

- Managed international inbound and outbound voice, chat and email support, including escalation handling.
- Administered security groups covering creation, updates, deletions and password resets.
- Installed, configured and supported Azure virtual machines and Windows Servers.
- Troubleshoot VMware issues including snapshots and virtual machine network configuration.
- Worked with application proxy, MFA, SSO and IAM technologies; prepared and maintained MIS reports and project plans.
- Trained and mentored team members while managing day-to-day process support.

Email Executive | Xalvadors Leads

2018 – 2019

- Handled email marketing, customer care and email support operations.
- Worked with email service providers including AWS, SendGrid and SparkPost, including API key integration.
