SUMMARY

Automation Engineer with 7+ years of work experience, including 1.5+ years building end-to-end automation systems for a computer hardware distributor. Built workflow automation in n8n, ERP integration with Microsoft Dynamics 365 Business Central, WhatsApp automation, a sales dashboard, a customer mobile app and AI chatbots. Comfortable working from the database and API layer to the frontend and mobile delivery.

SKILLS

Automation and Integration: n8n (self-hosted, Docker), REST API, Webhooks, WhatsApp Business API (Meta)

ERP: Microsoft Dynamics 365 Business Central (administration and API integration)

Development: React, JavaScript, Git, GitHub

Database and Backend: Supabase, Firebase

Mobile: GoodBarber PWA, Google Play Console

AI and Chatbots: Chatbase, Gallabox, AI prompt writing

Microsoft 365: SharePoint, Teams, user and licence administration

Reporting: Power BI, MIS reports

WORK EXPERIENCE

Digital Transformation Lead (Automation Engineer) **Mar 2025 – Present**

Supreme Computers India Pvt. Ltd.

- Designed and maintain production automation workflows on a self-hosted n8n instance running on Docker.
- Built an automated WhatsApp system (Meta Business API) that sends invoices and credit memos as PDF attachments to customers, triggered by ERP webhooks.
- Integrated Microsoft Dynamics 365 Business Central through REST API for live invoice, customer, item and vendor data.
- Administer Business Central end to end: user creation, permission sets, role assignments and access control.
- Built a WhatsApp-based OTP login and verification system for employees using the Meta WhatsApp Business API and Supabase, with database-level access controls.
- Designed WhatsApp chatbot flows in n8n and Gallabox with automated routing and human handoff. Trained an AI customer assistant on Chatbase across multiple LLM models and refined prompts to improve accuracy.
- Built and published a customer mobile app and PWA on the Google Play Store, with a Supabase backend, live data from n8n and Firebase push notifications.
- Manage Microsoft 365 and SharePoint: user provisioning, licence allocation, security permissions, Teams channels, billing and the public partner price book portal.

Data Analyst **2020 – 2025**
Stats Perform

- Handled international inbound and outbound voice, chat and email support, including escalations.
- Worked with application proxy, MFA, SSO and IAM. Troubleshot VMware issues including snapshots and virtual machine network configuration.
- Prepared and maintained MIS reports and project plans.
- Trained and mentored team members and managed day-to-day process support as shift lead.

Email Executive **2018 – 2019**
Xalvadors Leads

- Handled email marketing, customer care and email support operations.
- Worked with email service providers AWS, SendGrid and SparkPost, including API key integration.

EDUCATION

B.Com, Information System Management | University of Madras **2014 – 2017**
